**MEET AND EXCEED ASTM
STANDARDS FOR SAFETY COVERS**

**POOL & SPA BEST
PRODUCT 2008 & 2009**

COMBINING BEAUTY WITH FUNCTION

Enhance your spa experience with the innovative Covana, the world's first fully automated all in one cover/gazebo. Combining beauty and function, the attractive remotely controlled Covana automatically elevates and lowers with the turn of a key.

Unlike most covers which require considerable strength and leverage to pull on and off, the Covana raises and lowers effortlessly, eliminating any lifting and straining. Within 20 seconds the Covana reaches its full elevated height of 8 ½ feet. Simply remove the key to secure the Covana at the desired height. The Covana has been built to fit the majority of 8 x 8 spas on the market.

The pitched roof design increases the character and aesthetics of your spa while easily shedding rain and snow.

Whether you are buying a new spa or want to enhance an existing one, the Covana spa cover is the perfect choice.

STAYING UNDER COVER

Whether you are battling wind, sun or bugs, the Covana will protect you. The overhead canopy provides excellent protection from harmful UV rays, rain or snow. Optional screens provide a beautiful, safe and private place.

ENGINEERED FOR EXCELLENCE

The Covana is built to provide years of worry free performance and protection. A balanced load design is the core of the Covana system, similar to garage door systems. Minimal horsepower is required lowering the costs and wear and tear on components substantially.

The Covana safely and securely locks in place preventing children and other unwanted intruders from gaining access to the spa. When in the lowered position, the Covana can support up to 600 pounds, providing improved barrier protection surpassing all other spa safety devices.

The free standing design is virtually maintenance free.

GOING GREEN WITH THE COVANA

The Covana offers considerable energy savings by reducing water and chemical evaporation and heat loss through the use of polyurethane foam, seamless design and insulation value of R-21. Unlike traditional covers that are flipped over the spa, the tight seal and perfect fit of the Covana keeps debris out of the water more effectively and reduces the amount of effort required to maintain water quality.
